Insert Node At Beginning

05 August 2020 16:29

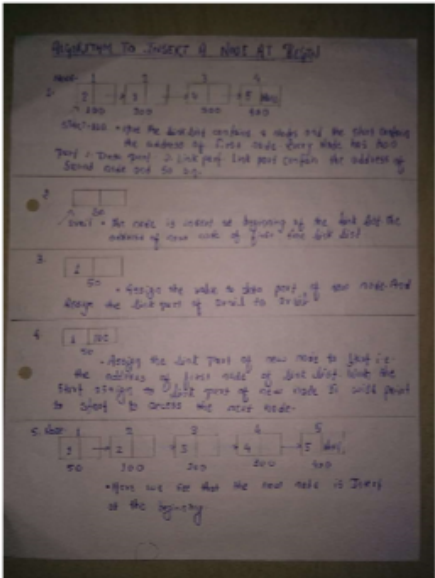

Insert node(start,avail,data)

```
if(avail=NULL)
    print"overflow"
    exit
endif
```

```
ptr<-start
save<-avail
avail<-link->avail
```

```
if(start=NULL)
    start<-save
    data->save<-data
    link->save<-Null
    exit
endif
```

```
data->save<-data
link->save<-start
end
```

data	1
ptr	start
save	avail

=	to check equality
<-	use for assign like a=b
->	For example link-> save i.e. link of save
end if	End of if statement
end	End of program
